TECHNIBUS ANNOUNCES SEISMICALLY CERTIFIED BUS

Company Becomes the Exclusive Provider of OSHPD Certified Metal-Enclosed Bus

FOR IMMEDIATE RELEASE - CANTON, OH - May 21, 2013 – With a focus on continually driving innovation and engineering excellence, Technibus, the leading provider of metal-enclosed bus duct solutions in North America, is pleased to be the only OSHPD seismically certified source for 600V-15kV metal-enclosed bus.

The California Office of Statewide Health Planning and Development (OSHPD) certification is quickly becoming a building code requirement across the United States for a variety of critical facilities including: healthcare, nuclear power, petro-chemical, data centers and industrial. These are also key industries for Technibus products. Earning certification number OSP-0222-10, Technibus is preapproved for OSHPD projects meeting all standards required.

While working closely with professional engineers and a nationally recognized lab, Technibus OSHPD certified seismic products also meet the requirements of: UBC-1997, IBC-2009, CBC-2010, ASCE7-10 with an Importance Factor of 1.5 in accordance with ICC-ES AC156 and IEEE-693-2005 High Level. Additionally, Technibus can provide Seismic P.E. stamped coordinated support structures for all of our equipment.

“We are thrilled to become the exclusive provider of OSHPD certified, metal-enclosed bus products in the United States”, said Dan Pomerleau , CEO & President, Technibus, Inc. “This certification is a true testament to our extraordinary expertise and tireless dedication to engineering and producing top quality products.”
