TECHNIBUS Offers New UL Certified Products ***Now Offering UL Listed Low Voltage Non-Segregated Phase Bus***

FOR IMMEDIATE RELEASE - CANTON, OH - May 21, 2013— Technibus, the leading provider of metal-enclosed bus duct solutions in North America, is now offering Low Voltage Underwriters Laboratories (UL) listed products.

Technibus continues to respond to the industry's high demand of UL listed, non-segregated phase bus duct products for power generation, petro-chemical, data centers and industrial projects. Working closely with Underwriters Laboratories and testing at the Rockwell Lab, Technibus now offers additional UL listed ratings and construction options for their low voltage products.

New UL listed offerings include: 3200-6000A products with short circuit ratings up to 100kA short time and 2500A product with short circuit rating up to 85kA short time, Stainless Steel (#304 & #316) bus duct enclosures with ¼" x 3" ground bus (all low voltage ratings), and Aluminum enclosures that have been ground path tested to 100kA short time, 133kA momentary & 250kA peak.

Additionally, Technibus offers ground bus that is used with their standard aluminum enclosures dealing with all low voltage ratings.

"Obtaining UL certification is an important achievement in our industry," said Dan Pomerleau, CEO & President, Technibus, Inc. "We strive to provide customers with the best products possible, and this certification verifies our commitment to quality, safety and service."
